

The UKCA logo is positioned in the top right corner of the image. It consists of the letters 'UK' stacked above 'CA' in a bold, white, sans-serif font. The background of the entire image is a photograph of an automotive assembly line, showing car chassis and robotic arms in a factory setting with large windows.

Contents

Aims of this session

- To give you an overview of the new policy measures announced
- To give you a chance to ask questions

What we'll cover

1. The timeline for UKCA Implementation
2. New BEIS measures
3. DLUHC measure on AVCP3
4. Questions

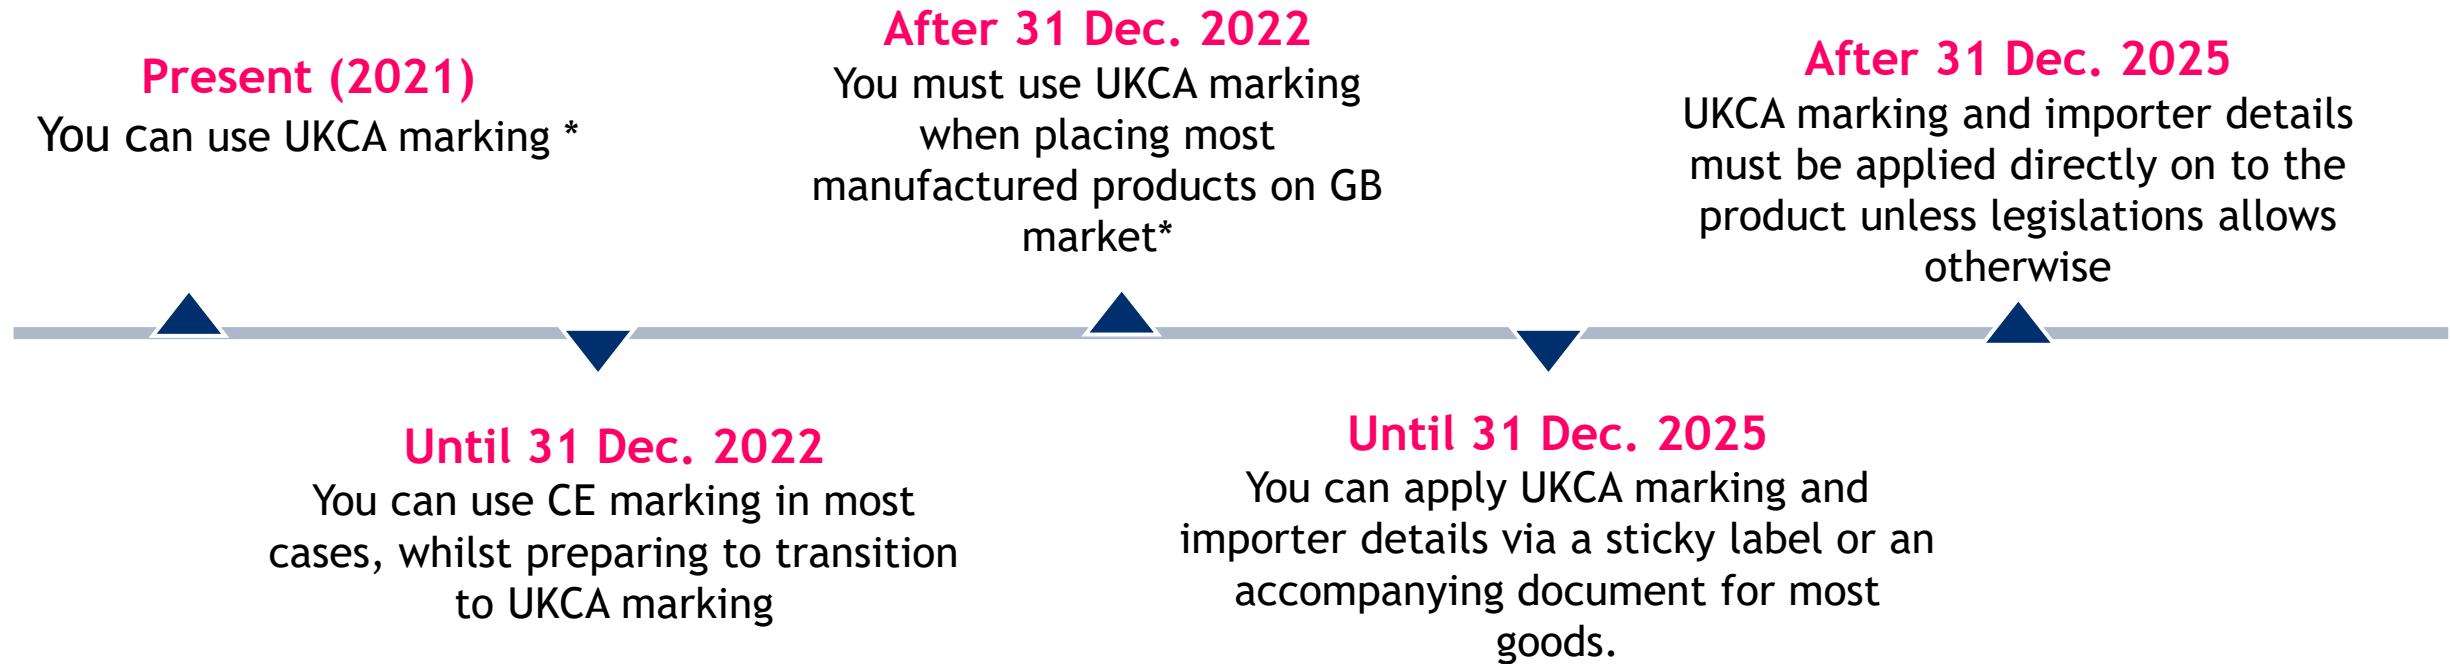

Key Messages

- We are taking a pragmatic approach to implementing the UKCA regime to make the transition as easy as possible for businesses.
- We have listened to industry and focused our measures on areas where we know you have concerns.
- These measures have been designed to reduce costs and burdens for businesses moving to the UKCA regime at a time when businesses and consumers face rising prices.

Timeline to Implement UKCA Marking

New Measures

Allowing the **UKCA marking and importer details** for goods from EEA countries, to be placed on the product via a sticky label or on an accompanying document until 31 December 2025.

Continuing to accept spares onto the GB market to **repair, replace and maintain** products.

Making clear that there is no need to re-test and re-mark **existing imported stock** brought into the UK before 31 December 2022.

Reducing re-testing costs, by allowing certificates provided by non-UK conformity assessment bodies (CABs) testing to EU requirements, issued before the end of this year to be used as a basis for UKCA marking certification.

NB: These measures do not apply to construction products, transportable pressure equipment, medical devices, cableways, marine equipment and rail products.

New Measures

Labelling easements

You can apply the **UKCA marking** on a sticky label to the product or with an accompanying document **until 31 December 2025**.

For goods imported from the EEA, **importer details** can be affixed on to the product via a sticky label or on accompanying document **until 31 December 2025**.

The accompanying document must stay with the good until it reaches its end user.

NB: These measures do not apply to construction products, transportable pressure equipment, medical devices, cableways, marine equipment and rail products.

New Measures

Spare parts

Continuing to accept spares onto the GB market to **repair, replace and maintain** products to the same conformity requirements in place at the time the original product or system was placed on the GB market.

Businesses should have documentary evidence to demonstrate the intended use of a product as a spare part.

NB: These measures do not apply to construction products, transportable pressure equipment, medical devices, cableways, marine equipment and rail products.

New Measures

Imported products

Existing CE-marked stock imported into GB under contract before the end of 2022 will not need re-testing and re-marking.

Products imported into GB for further manufacture or processing, will not be considered as placed on the market.

NB: These measures do not apply to construction products, transportable pressure equipment, medical devices, cableways, marine equipment and rail products.

New Measures

Reduce re-testing costs

We will allow certificates provided by non-UK conformity assessment bodies (CABs) issued before the end of this year to be used as a basis for UKCA marking certification.

The good **must still bear the UKCA marking**, and will need to undergo conformity assessment with a UK Approved Body at the expiry of the certificate or after 5 years (whichever is soon).

NB: These measures do not apply to construction products, transportable pressure equipment, medical devices, cableways, marine equipment and rail products.

New Measures

Construction Products

Manufacturers of construction products under AVCP System 3 - such as radiators, sealants and tile adhesives whose products are tested by an EU notified body before 31 December 2022 can use this to obtain a UKCA mark without having to retest through a UK-approved body.
